

PL/SQL + PDF = PL/PDF

Generate dynamic PDF documents from data stored in Oracle databases using the PL/PDF program package. PL/PDF is written exclusively in PL/SQL. It is able to either store the generated PDF document in the database or provide the results directly to a browser using MOD_PLSQL. No third-party software is needed; PL/PDF only uses tools provided by the installation package of an Oracle Database (PL/SQL, MOD_PLSQL). Use PL/PDF to quickly and easily develop applications with dynamic content but also quality presentation and printing capabilities.

If you wish to order PL/PDF, please proceed to the [Order](#) page. The cost of a PL/PDF licence is US\$600. A licence is required per Oracle database. The Trial version of our product is available on the [Downloads](#) page. The Trial version has two limitations: Only 5 pages per PDF document may be produced; All pages are watermarked. Our [Examples](#) page helps you get started on how to use PL/PDF. We have around 250 customers from all over the world! Check out our [Feedback](#) and [Reference](#) pages.

PL/PDF is more than a document generator for simple text. It includes:

- Character encoding support. The default encoding is cp1252, but all encodings are supported, including Unicode encodings. Apart from the 5 standard Adobe fonts (Helvetica (Arial, Sans Serif), Courier, Times (Serif), Symbol, ZapfDingBats), True Type Fonts may also be used. All European, CJK (Chinese/Japanese/Korean) and Arabic/Hebrew (Beta version only!) characters are supported.
- Native support for JPG and PNG. All other image formats are passed onto automatic conversion by Oracle Intermedia.
- Many linear and 2D barcodes are supported with our [Barcode](#) package.
- The [Chart generator](#) displays complex numbers in simple diagrams.
- The [Encryption](#) package provides ways to limit what users can do with generated PDFs.
- A Java based and a PL/SQL based LZW compression is available to reduce the size of PDFs.
- The [Template](#) feature makes it possible to add new content to an existing PDF document.
- Fill out your [Open Office](#) PDF forms with PL/PDF!

Please find out more information on these features on our [FAQ](#) page.

NEW!!! PL/PDF Toolkit is a Java library with PL/SQL interface for manipulating existing PDF documents. If you wish to order PL/PDF Toolkit, please proceed to the [Order](#) page. The cost of a PL/PDF Toolkit licence is US\$300. A licence is required per Oracle database. The Trial version of our product is available on the [Downloads](#) page.

The features of this new product are:

- PDF Encryption/Decryption
- PDF Metadata manipulation
- Extraction of text from PDF
- Merging PDF documents
- Replacement of URLs in a PDF document
- Stamp content or watermark into a PDF document
